

RATNESH CHAUHAN

Data Analyst | Power BI Developer | SQL & Python

+91-8577900499 | ratneshchauhan279@gmail.com | github.com/Ratnesh8577 | linkedin.com/in/ratnesh-chauhan

SUMMARY

Data Analyst skilled in SQL, Python, and Power BI, with a track record of building ETL pipelines, validating data quality, and delivering dashboards that turn raw data into decisions for business stakeholders.

WORK EXPERIENCE

Data Visualization and Analysis Intern — Infosys Springboard (Virtual)

Sep 2025 – Nov 2025

Tools: Python, SQL, Power BI, Excel, Pandas, NumPy, Matplotlib, Seaborn

- Wrote SQL queries to extract, transform, and analyze data across 5+ real-world datasets, applying ETL processes and data cleaning to improve data quality for reporting.
- Performed data validation and quality checks to ensure accuracy of datasets used in analysis and BI reporting.
- Built and maintained 3+ interactive Power BI and Python dashboards for data-driven decisions across business and operations stakeholders.
- Conducted exploratory data analysis to identify trends and patterns, translating findings into clear reports for non-technical audiences.

Project repository: github.com/Ratnesh8577/Info_Intern_Project

EDUCATION

Sagar Institute of Research & Technology-Excellence (RGPV), Bhopal, MP

July 2022 – June 2026

Bachelor of Technology, Computer Science & Engineering — 83.40%

TECHNICAL SKILLS

- Languages & Querying: Python (Data Structures & Algorithms), SQL
- Data Analysis: EDA, Statistical Analysis, Data Cleaning, Data Validation & Quality Checks, Data Preprocessing, Data Modeling, ETL Pipeline Development
- Reporting & Dashboards: Power BI, DAX, Data Visualization, KPI Tracking, Business Intelligence, Dashboard Development
- Libraries & Tools: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Jupyter Notebook
- Database & Platforms: MySQL, SQL Server, Excel, Google Sheets, Visual Studio Code
- Other: FastAPI, Generative AI (Gemini), Machine Learning fundamentals, GitHub
- Soft Skills: Stakeholder Management, Stakeholder Reporting, Problem Solving, Presentation Skills

PROJECTS

AirFly Insights — Airline Operations Data Analysis

Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly), Power BI, SQL | [GitHub](#)

- Analyzed 484K+ airline flight records to evaluate flight operations, delays, cancellations, routes, airports, and seasonal trends.
- Performed data cleaning, preprocessing, feature engineering, and exploratory data analysis (EDA) to prepare large-scale operational data for analysis.
- Developed analytical features including Month, Day of Week, Departure Hour, Route, Delay Indicators, and Cancellation Indicators to identify operational patterns.
- Analyzed airline, airport, route, time-based, and delay-cause performance to identify operational bottlenecks and delay-prone routes.
- Built KPI-driven visualizations and Power BI dashboards to communicate flight volume, average delays, cancellation rates, and airline performance.
- Delivered on-time-performance reports to stakeholders, cutting manual reporting effort by 40% and speeding up operational decision-making.

Mobile Sales Dashboard — Sales Performance Analysis

Power BI, DAX, Data Modeling, Data Visualization | [GitHub](#)

- Developed an interactive Power BI sales dashboard to monitor mobile sales performance across brands, models, cities, payment methods, and time periods.
- Designed KPI cards to track Total Sales, Transactions, Quantity Sold, and Average Price, enabling quick performance monitoring.
- Analyzed brand-wise, model-wise, city-wise, and payment-method sales, improving sales-reporting accuracy by 25% for stakeholder reviews.
- Implemented MTD vs. Last Year (LY) analysis to evaluate sales growth and business performance over time.
- Added interactive filters and drill-down analysis for brand, model, city, payment method, and date, improving business decision-making efficiency by 30%.

Books Sales SQL Analysis — Sales & Business Insights

SQL, MySQL, Data Analysis, Aggregation, Business Analytics | [GitHub](#)

- Analyzed book sales data using SQL queries to evaluate revenue, orders, quantity sold, product performance, and customer purchasing behavior.
- Used JOINS, GROUP BY, aggregate functions, subqueries, filtering, sorting, and conditional logic to answer business-focused questions.
- Identified top-selling books, high-performing authors, category performance, revenue contribution, and customer purchasing patterns.
- Transformed transactional data into actionable sales insights that inform inventory planning, pricing strategy, and marketing decisions for stakeholders.

CERTIFICATIONS & ACTIVITIES

- Python Foundation with Data Structures & Algorithms — Itronix Solutions
- Data Analytics, Microsoft Power BI — Infosys Springboard
- MySQL & Database Management System — Infosys Springboard
- Leader, Shikhar Club — SIRTE, Bhopal, 2024 – Present | Member, True Sage Foundation, Bhopal
